

Question 7 :

7.

Write a script which loops for 10 times before exits

It can be anything. Even a incremental variable with a sleep time of 3 seconds between every count

Solution :

```
aman@aman-VirtualBox:~$ cd Desktop
aman@aman-VirtualBox:~/Desktop$ ls
Sample  sample.py
aman@aman-VirtualBox:~/Desktop$ python3 sample.py
Traceback (most recent call last):
  File "/home/aman/Desktop/sample.py", line 1, in <module>
    Print ("Python code running using second method :)")
NameError: name 'Print' is not defined. Did you mean: 'print'?
aman@aman-VirtualBox:~/Desktop$ python3 sample.py
Python code running using second method :)
aman@aman-VirtualBox:~/Desktop$ ls
Sample  sample.py  wait.py
aman@aman-VirtualBox:~/Desktop$ python3 wait.py
10
9
8
7
6
5
4
3
2
1
Exit !!
aman@aman-VirtualBox:~/Desktop$
```

Code :

```
import time
n=10

while n>0 :
    print(n)
    time.sleep(3)
    n-=1
print("Exit !!")
```
